How Chili Piper saves 20 hours a month automating HR with Bob

Chili Piper, a fully remote company based in New York with employees in 36 countries, managed HR with a lean team and no admin support. After implementing Bob, they automated their HR processes, freeing time to focus on strategy and culture. Bob also helps them deliver personalized employee journeys, such as onboarding experiences tailored to roles and locations, and surveys for capturing employee feedback and guiding decisions.

20 HOURS

a month saved by automating workflows with Bob.

36

Countries represent Chili Piper's global workforce.

“When we wrote a decision memo for Bob, I estimated we’d save 20 hours a month by automating onboarding, offboarding, and things like that. But we’re also providing a better onboarding experience and self-servicing more things than we were before. So there’s time that’s hidden there too.”

Hallie Condon | VP of People, **Chili Piper**

“Our biggest gain from Bob comes from the time saved from automations. It lets us focus on what actually impacts our people. Plus, Bob connects to so many tools, which is really helpful. It saves us a lot of time and manual effort.”

Hallie Condon
VP of People, **Chili Piper**
